

PREFACE

CompPlan 2030 serves as a general policy guide for future community improvements and decision-making. This document provides the basic framework for land use, transportation, natural systems, other public services, and community improvements. This document reflects the second five-year update of CompPlan 2030 which was adopted on [REDACTED]. Upon adoption of this plan update, land use changes and other recommendations will occur. CompPlan 2030 is a living document with a continuous implementation process. The new recommendations will be given timelines for completion (from immediate to 20 years) and will be assigned to agencies responsible for their implementation. Not all recommendations will be implemented. Committed citizens must continue to work hand-in-hand with the appropriate government agencies and the private sector to fully realize the vision and initiatives and changes set forth in the plan. The local government must continue to approve funding for any programs or capital improvements such as parks, sidewalks, and streets, fulfilling its commitments to our community.

Five-Year Update Acknowledgements

The City of Auburn would like to thank all of the residents and stakeholders for their participation in the update of this plan.

The five-year update to CompPlan 2030 was authored exclusively by City staff. Thanks go to the following departments for providing valuable expertise during the planning process:
